PROFILE

Motivated Computer Science student with a strong interest in backend development and enterprise systems. Experienced in building RESTful APIs using Java and Spring Boot with MySQL integration. Passionate about developing secure, scalable, and reliable backend applications while continuously improving technical and problem-solving skills.

PROJECTS EXPERIENCE

MovieFlix REST API

2025- 2026

(Spring Boot + MySQL + JWT Security)

- Designed and developed a RESTful backend system for managing movies and users
- Implemented layered architecture
- Built authentication and authorization using Spring Security and JWT
- Used DTO pattern to separate API request/response models from database entities
- Implemented global exception handling using @ControllerAdvice
- Integrated MySQL database using JPA/Hibernate
- Applied validation and error handling for secure API responses
- Tested endpoints using Postman
- Managed source code with Git and GitHub

Auto Spare Part Car(PHP+ MySQL)

2024 - 2025

- E-commerce platform for vehicle spare parts.
- Features: Shopping cart, product search, admin panel.

WooxTravel (PHP+ MySQL)

2024 - 2025

- Tour booking platform.
- Features: Tour booking system, admin management.
